Welcoming Words

Dear Conference Participant,

We are delighted to welcome you to the 8th EMES International Research Conference, hosted by the University of Zaragoza in its Teruel campus. This is a landmark event for our research community in a number of ways.

It is the first time we have offered a hybrid event, consisting of face-to-face and digital participation. It is also our first conference in a province and city far from urban dynamics, and which is an epicentre of the depopulation crisis affecting the European rural world. Of course, this is all taking place against the backdrop of the devastating global Covid-19 pandemic that has disproportionately impacted our most vulnerable individuals and communities. It seems to us that Teruel - designated as the 2021 Social Economy Capital by the Spanish Ministry of Labour and Social Economy - provides a poignant venue for the EMES international research community to both reflect on, re-imagine and renew social enterprise, cooperative and voluntary action principles and values in this unprecedented global context.

Our heartfelt gratitude goes to our partners and supporters in this event; the Empower-SE COST Action, the University of Zaragoza’s GESES Research Group (Grupo de Estudios Sociales y Económicos del Tercer Sector), the Social Economy Laboratory LAB_ES, CEPES Aragon, Caja Rural de Teruel and of course, the City of Teruel, The Aragon Government, the Catalunya Government, and the Ministry of Labour and Social Economy. This conference also marks the closing of the Empower-SE COST Action (16206) after four years of activities and initiatives to empower the next generation of SE researchers and research communities in peripheral countries.

We hope you enjoy what promises to be an exciting programme of varied, high quality conference papers from upcoming and established scholars in the field of social enterprise, broadly defined.

About the organizers

EMES International Research Network has held major international conferences since 2001 and gathers 15 established university research centres and nearly 400 individual researchers from over 50 countries. Together, we aim to build up a body of knowledge around our SE concepts including social enterprise, social economy, solidarity economy and social innovation working on international research projects and exchanging on research topics, results and methodologies. We believe in the power of connecting a community of researchers around the world to advance the SE fields. EMES seeks to intercommunicate each other’s interests, publications and related information while exchanging opportunities for joint publications and research.

COST (European Cooperation in Science and Technology) is a pan-European intergovernmental framework. Its mission is to enable breakthrough scientific and technological developments leading to new concepts and products and thereby contribute to strengthening Europe’s research and innovation capacities. This conference is the closing event of Action 16206 “Empowering the next generation of social enterprise scholars” (EMPOWER-SE).

University of Zaragoza-GESES (Grupo de Estudios Sociales y Económicos del Tercer Sector) is a research group formed by an interdisciplinary team of professors from the University of Zaragoza, from the departments of Management and Organization of Companies, Accounting and Finance, Psychology and Sociology, in coordination with external researchers. Institutional member of EMES since 2019, the lines of work of GESES include: 1) Companies and Organizations of the Social Economy; 2) Public Policies and Sustainable Development; 3) Complex Social Problems and Social Innovation; and 4) Social Responsibility and Sustainable Development Goals.

In partnership with:
Last March 2021, the Ministry of Labour and Social Economy of the Government of Spain designated Teruel as the first Spanish Capital of the Social Economy due to the location in this city and its surroundings of social economy experiences with an important local impact and with a great historical tradition, as well as for the key element they represent to tackle depopulation and provide services to the rural environment, especially in one of the regions most affected by this situation in Spain. This nomination represents the seed of the future Network of Cities for the Social Economy in the country.

In this context, Teruel offers an ideal setting for the 8th EMES International Research Conference on Social Enterprise, creating synergies that enhance the image of the city together with an academic event of international scope. It also allows EMES, as a network of people and research entities, to emphasize the need to foster exchanges and connections between the academic field and the social challenges faced in these territories on a daily basis.

EMES is about networking... even in a hybrid environment

Given the hybrid nature of this conference and all the online events that you have probably attended this past year, you may think that networking is not a priority for us. Well, EMES conferences are all about meeting great researchers who are great people as well so this is what we propose to you depending on the modality of your participation.

Networking face-to-face

Although talking with each other and creating new contacts have never been an issue at any of the EMES events, we like to facilitate the identification of your colleagues and peers so you have an idea before approaching new people. We will use the following identifiers on the delegates name tags:

- Red dot: member of EMES
- Blue dot: PhD student
- Green dot: new at an EMES conference

Networking online

Online delegates will have the possibility of networking within the platform where the conference will be streamed. A “networking” area will allow online participants to set up meetings with other delegates and plenary session speakers. Guidelines on how to do this will be provided to online participants.

Eventsbox by Meetmaps - This is the tool that allows you to access the digital space of the Conference and make the most of your participation. You will be able to access all the event information, check the daily schedule and create your personalised agenda, send a direct message to participants, receive reminders of saved sessions and access the latest conference news.

Presentations planned online are marked with the camera sign whereas those with no icon will be presented face-to-face in Teruel.

Likewise, session chairs who appear with the icon (Human) will be chairing virtually.

PhD SOCIAL EVENT
MEETING POINT TBC: PLAZA TORICO - TERUEL CITY CENTER

ORGANIZED CULTURAL VISIT – TERUEL’S LOVERS SITE
MEETING POINT TBC: PLAZA TORICO - TERUEL CITY CENTER

If there is a legendary story that identifies Teruel in the world, it is that of the Lovers of Teruel. In the 13th century, Teruel was a frontier town facing the Muslim taifas of Valencia. Juan Diego Martínez de Marcilla and Isabel de Segura, who have been in love since they were young, intend to marry, but Don Pedro, the bride’s father, is opposed for economic reasons. Marcilla gets a five-year period from the bride’s family to make his fortune and leaves for war to do so. Given the lack of news after his departure, Isabel’s father thought of finding a rich man for his daughter to marry her off to, and set his sights on Don Pedro de Azagra, a powerful man and brother of the Lord of Albarracín.

On the same day that Marcilla returned with his fortune to marry Isabel, the families of Azagra and Segura had celebrated the nuptials of their children. That same night, in desperation, Marcilla climbed up to the house of the newlyweds and, entering the bride’s chambers, asked her for a kiss, which she, as a married woman, refused. In his grief, Don Diego fell dead.

The next day, while the funeral was taking place, Doña Isabel got up from her seat in the church and approached the body and gave him the kiss she had denied him in life. Instantly she fell dead.

When the town heard of the events, their families decided to bury them together. From then on, history will know them as the Lovers of Teruel. Today their remains can be visited in a mausoleum attached to the church of San Pedro, in the centre of Teruel.

Gala Dinner

El Milagro Restaurant
www.restauranteelmilagro.com

The local band D’Colorao will ensure that music (and dance) make their appearance.

Shuttles will be provided; meeting point for departure at Mesón El Óvalo in Teruel city center.

D’Colorao is a flamenco-fusion group; their songs are based on different flamenco styles (such as rumbas, bulerías, alegrías, etc.), but always with an open spirit to experimentation with other types of music. The group was born in September 2014 with Irene Gómez’s poems as a basis for music. She is the vocalist and lyricist of the group and grew up in Aliaga, a village in Teruel. The other members of the group are Mariano Bailera (flamenco guitar), Simone Orsini (electric bass) and Darío Bernad (percussions). They all live in Zaragoza.

They offer a show that is a mixture of emotions, a delight of creativity and authenticity through their own themes, in which they cover topics such as self-esteem, gender violence, nature, friendship, etc. It is an invitation to joy and to embrace the passion for music and flamenco. In addition to their personal repertoire, they perform covers of other renown artists such as Lole y Manuel, Manzanita or Camarón de la Isla.

Study Visits to SE Experiences in Zaragoza: La Magdalena, a cooperative neighborhood

The neighborhood of La Magdalena is located to the east of the Old Town of the city of Zaragoza, within the limits of the old Roman wall. The cooperative tradition of Zaragoza has a long history, but in recent years La Magdalena has brought together a significant number of cooperatives, linked to the associations and networks that the neighborhood has historically had.

In just 500 meters around the tower of the Plaza de La Magdalena there are enterprises that are part of the social and solidarity economy: cooperatives that innovate, that take a step forward, such as the vegetarian restaurant Birosta, La Ciclería - Zaragoza’s social center of the bicycle, the Germinal printing company, with more than 30 years of existence, the social bookstore La Pantera Rossa, the vegetarian creperie A Flama, the design studio with recycled materials Recreando, Aupro - cooperative that brings together architecture with engineering, environment and photography, or the tapas bar La Otra, among others.

Safe conference facing COVID

The following basic principles of COVID-19 security and prevention have been established, which will guide the establishment of measures for the operation of the face-to-face part of Conference:

1. Contact limitation
   A major effort has been made to offer the Conference in a hybrid format through a user-friendly platform that approximates physical participation in order to meet the limited number of contacts required. In addition, seating capacities have been established in the parallel session rooms and safety distance between seats in the plenary sessions, leaving it to the contribution of those attending in person to avoid crowds in the corridors of the buildings.

2. Personal prevention measures
   Proper use of the mask, which will be compulsory during the Conference, and frequent and meticulous hand hygiene are basic measures to avoid transmission, as well as respiratory hygiene. To encourage this, a mask and hand gel can be found in the Conference welcome bag and will also be available at the Conference reception.

3. Cleaning and ventilation
   The University of Zaragoza has a very demanding cleaning protocol to ensure the regular academic activities are carried out in its facilities. In order to support this work, we have sought to leave the facilities after each work period, when the classrooms should be ventilated, and to be able to be outdoors for as long as possible.

4. Case management
   The University of Zaragoza has established a procedure for dealing with the onset of symptoms in any person in the university centre, which will be adapted to the existing scenario at any given time, adjusting to the downward trend or becoming more demanding in accordance with the recommendations of the health authorities, depending on the situation. In any case, people with symptoms compatible with COVID-19 will not be able to access the facilities, for which we request the contribution of all delegated.

LUCA APP - It is a solution that allows the registration and tracking of contacts in a fast and respectful way with our privacy, both for the public events of the Conference and for the private meetings that we may have. As users we have to register at the entrance to the conference rooms and building through the QR code that will be visible on the wall, and cancel the presence at the exit. In this way, we can have the traceability of the contacts we have had during the 4 days of the Conference in order to confirm or discard our close proximity to a positive COVID case, if it arises.
